11. (Internal Use Only - LLM) Returned the call of Major Bob McFarlane, on the staff of General Brent Scowcroft, Deputy Assistant to the President for National Security Affairs, and in response to his request gave him a rundown on the pending Freedom of Information Act amendments, the current law, case law, impact of the legislation on the Agency and a status report on our efforts on the Hill and within the Executive Branch. I told him that the Senate Judiciary Committee might act on S. 2543 tomorrow before the LIG meeting. In response to his queries I gave him a rundown on members of the full Committee who might be favorably disposed to our position and said that Justice was apparently not having a great deal of success in turning the situation around. McFarlane appreciated the status report, understands the need to move briskly, and said he would be in touch with Tom Korologos, of the White House staff, and with the Department of Justice.

12. (Internal Use Only - LLM) Spoke twice during the day to Jim Oliver, OMB, concerning the Agency's views on DOD 93-84 concerning DOD legislation affecting DIA and NSA personnel authorities and disclosure requirements. OMB is looking to the Director in terms of his authority under the November 1971 Presidential letter and said that in view of the probably strong opposition to the legislation by the Civil Service Commission the Director's support for the legislation would have to be detailed and persuasive to turn the situation around within OMB. I told Oliver we would need more time to come up with such a detailed report and he said that Dr. Hall is pressing them and he would appreciate receiving our comments within the next three days. IC Staff will be requested to assist.

13. (Confidential - JGO) Talked to James E. Wilson, Deputy Director, House Committee on Science and Astronautics, and tentatively arranged for a briefing by members of the Committee staff for the DDS&T Career Development Course for Thursday, 23 May, at 2:00 p.m. Wilson will call me after he has discussed the matter with Jack Swigert, Executive Director of the Committee. [REDACTED] DDS&T, has been advised.
